EDUCATION

KIIT University	BTech in Computer Science and Engineering Current CGPA: 8.58	2024 - 2028
------------------------	---	-------------

SKILLS

Languages	C++, Java, Python, JavaScript, TypeScript, C
Frontend	React, Next.js, HTML5, CSS3, Tailwind CSS
Backend	Node.js, Express.js, FastAPI, REST APIs, JWT Authentication, BullMQ
Databases	PostgreSQL, MongoDB, Redis, Firebase, NeonDB
Machine Learning	Scikit-learn, Pandas, NumPy, Streamlit, Joblib, OpenAI SDK, OpenRouter
Tools	Git, GitHub, Docker, Kubernetes, Postman, Vercel, Railway, Figma
Core Concepts	Data Structures and Algorithms, Object-Oriented Programming, DBMS, Operating Systems, Computer Networks, Concurrency

PROJECTS

VedaAI – AI Assessment Generation Platform [GitHub](#) | [Live Demo](#)

Tech Stack: Next.js, React, TypeScript, Node.js, Express.js, MongoDB, Redis, BullMQ, OpenRouter

- Engineered a scalable AI assessment platform using Redis and BullMQ to process concurrent LLM requests asynchronously.
- Designed REST APIs for authentication, assignment management and AI-powered assessment generation using OpenRouter.
- Built production-ready React interfaces and optimized MongoDB schemas for efficient backend performance.

Used Car Price Prediction using Machine Learning [GitHub](#) | [Live Demo](#)

Tech Stack: Python, Pandas, NumPy, Scikit-learn, Streamlit, Joblib

- Built an end-to-end machine learning pipeline using 9,582 vehicle listings to predict used car prices.
- Performed preprocessing, feature engineering, one-hot encoding and trained Linear, Ridge and Lasso Regression models achieving an R^2 of 0.79.
- Developed and deployed an interactive Streamlit application for real-time price prediction.

FitForge AI – AI Gym Training Schedule Generator [GitHub](#) | [Live Demo](#)

Tech Stack: React, TypeScript, Node.js, Express.js, PostgreSQL, NeonDB, OpenRouter

- Developed an AI-powered fitness platform that generates personalized workout plans using LLMs.
- Designed PostgreSQL schemas and REST APIs for scalable workout generation and user management.
- Implemented authentication and responsive React interfaces for a seamless user experience.

DONUM – E-Commerce Platform [Live Demo](#)

Tech Stack: React, Node.js, Express.js, MongoDB

- Developed a full-stack e-commerce platform with product browsing, shopping cart and admin dashboard.
- Built secure REST APIs using Express.js and MongoDB with JWT authentication.
- Deployed the application and optimized frontend responsiveness and backend performance.

ACHIEVEMENTS

- Winner of the Ignithon College Hackathon (Intermediate category).
- Solved 200+ Data Structures and Algorithms problems across LeetCode and Codeforces.
